

## Synker – Office 365/Exchange Migration suite.

Migrate easily from POP3/IMAP and legacy archives to Office 365.

Office 365 offers the best in class collaboration experience between employees with advanced security and communications features, yet how would you migrate from your legacy systems to Office 365 without causing disruption or downtime ?!

Synker migration suite is the tool

Synker enables you to easily migrate from legacy messaging systems and platforms or archives like Enterprise vault without worrying about complex server side configuration or handling DNS updates.

### Why to use synKer

- Simple licensing program to license the number of migrated mailboxes
- Extensive reports and logging system
- No scripting or special skills are required.
- Migrate with full retention of SMTP/Email information and move even calendar items and folder structure.

### Continuously synchronizes emails

- Synker continuously synchronize emails from legacy platforms to O365 or Exchange
- Intervals of synchronization could be 10 minutes or 2 hours according to your needs
- No need to configure complex server side components to control mail flow

### Fully automated client side configuration

- Migrate your old workgroup or domain Windows profile with all of its settings to a new profile (if you are migrating profiles) with full APPX support
- Overcoming ADMT limitations so you don't have to copy profiles or fix APPX
- Full Outlook profile configuration automation including mapping old PST avoiding helpdesk nightmares and lost data

### Migrate from Legacy Archives

- Support of legacy archives including Enterprise vault
- Support SharePoint, OneDrive, and file share
- Migrate using native APIs with full resume/pause support
- Multithreading moves so each archive is handled by 4 processes for heavy mailboxes
- Extensive reporting and error tracking

# How it Works?!

## Easy migration, no complex steps

- Just create a simple CSV file and import it into synKer and let the magic happens
- Simple licensing program to license migrated mailboxes with all of the supported features.
- Multithreaded moves enabling rapid migration.
- Full client side migration automation for Windows and Outlook profiles.
